

# MALIK MUHAMMAD MUZAMMIL

## Software Engineering Student

Bahawalpur, Pakistan | [muzzamilbwp@gmail.com](mailto:muzzamilbwp@gmail.com) | [github.com/malikk-muzammil](https://github.com/malikk-muzammil) | [linkedin.com/in/muzammil666](https://linkedin.com/in/muzammil666)

## SUMMARY

Software Engineering student at FAST-NUCES building a strong foundation in C++, object-oriented programming, and data structures. Comfortable turning core programming concepts into working console applications, and currently strengthening problem-solving skills through structured algorithm practice.

## EDUCATION

### FAST National University of Computer and Emerging Sciences (FAST-NUCES)

*Chiniot-Faisalabad Campus*

*Bachelor of Science in Software Engineering — Expected May 2028*

**Relevant coursework:** Programming Fundamentals, Object-Oriented Programming (C++), Digital Logic Design, Data Structures & Algorithms (in progress)

## TECHNICAL SKILLS

**Programming Languages:** C, C++

**Web:** HTML, CSS

**Core Concepts:** Object-Oriented Programming, Problem Solving, Data Structures & Algorithms (learning)

**Tools:** Git, GitHub, Visual Studio Code

## PROJECTS

### Chess Game

*C++ / Object-Oriented Programming*

- Built a console-based chess game applying OOP principles — classes, objects, and inheritance — to model game pieces, board state, and turn logic.
- Developed as part of a group project; owned the Piece base class and Knight/Pawn implementations.

### Student Management System

*C++*

- Built a console application to manage student records, applying structured programming and file handling to organize and process data.

### Hospital Management System

*C++*

- Developed a console-based system to manage patient and hospital records, practicing data organization and application logic for a real-world scenario.

### Console-Based Quiz Game

*C++*

- Created an interactive quiz application using conditional logic, loops, functions, and score tracking to reinforce programming fundamentals.

### Room Occupancy Counter

*Digital Logic Design*

- Designed a digital logic circuit to track room occupancy, applying combinational and sequential logic concepts from coursework.

## ACHIEVEMENT

Certificate of Participation — Coding Competition, Islamia University Bahawalpur
